Professional Summary

Backend Engineer specializing in **Java and AWS-based microservices** with 4.4 years of experience in delivering production-grade systems for enterprise banking and insurance domains. Proven track record of **automating CI/CD pipelines**, optimizing data workflows, and strengthening cloud security with tools like **SonarQube, Fortify, and JUnit**. Passionate about scalable architecture, performance tuning, and end-to-end delivery automation.

Technical Skills

Languages: Java, TypeScript, SQL

Frameworks: Spring Boot, Junit, Mockito

Cloud & DevOps: AWS (Lambda, SQS, SNS, RDS, CloudWatch, Step Functions), GitHub Actions, Jenkins, RLM

Containers & Orchestration: Docker, Kubernetes, OpenShift

Tools: Kibana, Splunk, Fortify, Apigee, Okta, Postman, SoapUI, Git, JIRA, Confluence

Professional Experience

Systems Engineer — Tata Consultancy Services | Feb 2025 – Current

Client: Citi Bank (Banking & Financial Services)

- **Automated DevOps workflows**— RLM ID creation, deployments through Jenkins, and containerized microservice status checks in OpenShift, **saving ~10 developer-hours** per sprint.
- Standardized version control by migrating projects from Bitbucket to GitHub.
- Enhanced observability by creating **custom Splunk dashboards** for log analysis.
- Developed and deployed APIs to enhance Fixed Deposit (FD) functionality, enabling seamless investments via mobile and web apps across Singapore and Hong Kong markets.
- Strengthened application security and enhanced code quality by writing **unit test cases using JUnit and Mockito** and identifying and fixing vulnerabilities, driving higher code coverage through **SonarQube and Fortify** analytics.

Senior Software Engineer — LTIMindtree | Jun 2021 – Jan 2025

Client: Principal Global Services (Insurance & Wealth Management)

- Automated data consolidation for **10M+** insurance agents across 70+ tables, enhancing data reliability.
 - Purged **1M+ redundant DB2 records** using AWS Lambda, EC2, SQS, and RDS, boosting system performance.
 - Developed centralized AWS database for **\$4.5M bi-weekly disbursements**; reduced processing time from **2.5 hrs to 45 mins**.
 - Developed REST APIs with Spring Boot and automated CI/CD via GitHub Actions, **cutting release time by 30%**.
 - Created AWS **CloudWatch dashboards** for proactive monitoring and disaster recovery plans for critical systems.
-

Education

- B.E. (Computer Science & Engineering) | RCOEM, Nagpur | 2017–2021 | **CGPA: 8.0**
 - HSC: Shri Shivaji Science College, Nagpur – **78%**
 - SSC: Bhartiya Vidya Bhavan's, Nagpur – **93.4%**
-

Certifications

Oracle Certified Java 8 Programming Associate | AWS Partner Technical Accreditation | AWS Cloud Specialization (Coursera) | TypeScript Programming

Awards & Recognition

Rising Star Award – For optimizing AWS-based automation workflows

Best Team Player Award – Recognized for cross-functional collaboration

Spot Award – For rapid delivery of high-impact backend modules
